

# The BOSA Connection

## From the desk of Paul Bosa:

I wanted to take this opportunity to thank everyone for their continued effort and support in 2008, and more importantly to extend wishes of health and prosperity for the New Year. It seems like the New Year is a time of refocusing for everyone, a time to reevaluate our lives and what's important us.

As a business we do the same – we evaluate where we're at – and focus on where we're going. It's no secret that 2009 will bring economic challenges, but these are not challenges that we haven't faced before.

The generation before us faced many challenges, and in doing so they became stronger and better for it. They dug down deep inside and fought for their existence, soon earning a reputation for hard work, dedication and pride.

In setting our goals for 2009, my point is simple; we need to "get back to our roots"! We need to push ourselves to be the absolute best we can be. And when we do this, not only will we prosper, but I can also guarantee that you will feel a new found sense of pride!

As a group we will face new challenges head on, never wavering in our goals, and as a group we can share in the rewards.

## Project Status –
